

# Cubìa

Sicilia DOC

100% Insolia. Vineyards cultivated on hills at 700m asl, South exposure, at a density of 4500 plants per hectare and yield of 60 hectoliters per hectare. The average age of the vines is 20 years, manual harvest into cases in the first 10 days of September.

## **Vinification**

Cold fermentation in contact with skins and successive static clarification. Fermentation in 20 hectoliter barrels and a period of around 6 months on the fermentation lees, followed by aging in the bottle.
